

# ANIMAL CLIPPERS 2020

# ANIMAL CLIPPERS 2020

Dear customer,

This catalogue contains all LISCOP quality clippers for horses, cattle, sheep and small animals (dogs).

Our product range was born from experience, the progress of technology and its requirements.

Lister GmbH, Germany was established in 1954 and since more than 60 years Lister GmbH, Germany has grown to one of the leading manufacturers of **animal clippers**, **drinking bowls/ drinking systems**, **electric fencing** and **farm and stable accessories**.

**Lister Germany products are always a good choice!**

Take a look at the new catalogue. Our products will convince you.

As a manufacturer based in Germany, we pay attention to quality. Our staff is at your service with help and advice.

Furthermore our business-units of **dairy and industrial cooling** have expanded.

Further details can be found on our website [www.lister-kuehlung.com](http://www.lister-kuehlung.com).

**Lister GmbH Germany -  
always the right decision!**

Visit us on the internet:

## LISCOP ANIMAL CLIPPERS

### Powerful clipping for professionals and hobby farmers

Specialised clippers should meet the requirements of different kinds and structures of coat to achieve the required clipping results. The LISCOP range of electric animal clippers is fine-tuned to the requirements of professionals and hobby farmers according to practical experiences.

### THE DC ENGINE

The general difference between an AC-engine (alternating current) and a DC-engine (direct current) can be explained with the design of these engines.

On the one hand there is the AC-engine:

The stator (static component) and the rotor (rotating component) get electrified.

On the other hand there is the DC-engine:

Just the rotor gets electrified. The stator consists of a permanent magnetic field.

Because of this the DC-engine requires a significant smaller installation space compared to the AC-engine. This allows to design the DC shearing machine housing smaller and more ergonomic compared to the AC-shearing machine housing.

Furthermore the DC-engine-technology is very energy-efficient.

The DC-engine with 200 watts power is comparable with a previous 400 watts AC-engine.

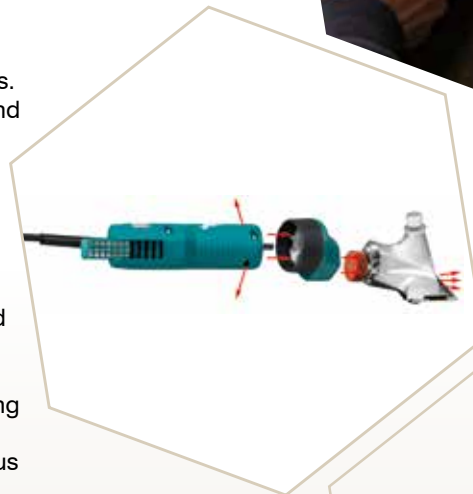

The DC-engine is more robust during the clipping procedure compared to an AC-engine.

The torque of the DC-engine is so strong that there are no noticeable rotation speed reductions even when clipping extremely dirty or thick matted fur.

### ERGONOMIC DESIGN

We always remain focused on the user-friendliness of our products. A comfortable ergonomic grip at the shearing machine housing and / or at the shearing machine head are as important for an optimal clipping as a low-vibration drive technology and a well balanced weight distribution of the complete shearing machine.

### AERATION SYSTEM

The partial draught aeration has proven its worth. It has been used at most of the LISCOP shearing machines for many years.

The intake air at the rear end of the shearing machine is targeted and regulated so that it is directed over the engine and the shearing head.

So the LISCOP clippers always “keep cool” even during continuous operation.

### THE IMPORTANT LUBRICATION SYSTEM

Shearing blades and drive components have to withstand extremely high stress during clipping.

So the regular lubrication of these parts is necessary. We hereby recommend to use our LISCOP shearing machine oil which has especially been designed for this application.

In regular intervals of 10 minutes the blade tips and the rear contact points of the blades should be lubricated as well as the drive components (by letting oil flow into the oil bush).

To prevent damage through the use of a wrong lubricant please always use our special LISCOP clipper oil.

**All noise specifications are in accordance with DIN EN ISO 4871. Uncertainty KWA = 2.5 dB**

## WHY THE PROFESSIONAL USER OPTS FOR LISCOP ELECTRIC ANIMAL CLIPPERS:

- well-known LISCOP quality, “Made in Germany“
- smooth running reliable engines with large power reserve
- motor protection switch as protection against extreme overload to avoid rotor defects
- the machines are extremely easy to handle and the user-friendly housing-design al lows fatigue-free clipping
- powerful cooling fan for partial draught aeration enables permanent cooling of engine, clipping head and shearing blades
- sturdy clipping head housings made of die-cast aluminium
- capacitors protected against moisture
- optimized modular design
- continuously lubricated, fully encapsulated transmissions prevent the ingress of conta mination like dirt or hair
- generously dimensioned air filters can easily be removed (without tool) and quickly cleaned
- oil distributor inside clipping head for precise allocation of oil to the relevant machine parts
- these machines run smoothly and best clipping results can be achieved due to the fact the machines are equipped with eccentrics used as weight compensation against blades-movement
- perfected, changeable upper-blade support especially smooth running point-support with continuously lubrication
- 5 m power cable with “Euro contour plug“ (alternative: 3.5 m power cable with “commonwealth plug“)
- All machines are delivered “ready to use“, completed with our high class LISCOP shearing blades and LISCOP special shearing machine oil in sturdy plastic cases

**Get the 24 month manufacturer’s warranty for your shearing machine still today!!**

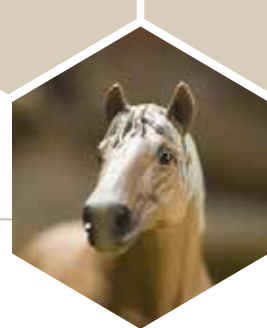

Register your product on our website:

**[www.lister.de/garantie](http://www.lister.de/garantie)**

Lister GmbH will reward you for the online-registration of your shearing machine with a manufacturer’s warranty of 24 months.

## Horse Clippers

### PROFI LINE HORSE (1700-1-DC)

The new generation of clippers for the professional horse clipping.

The powerful DC motor (DC Technology) with a power of 200 Watt (corresponds to about 400 Watt in conventional AC Technology) convinces even under the most adverse conditions without noticeable drop in speed.

The new engine technology of the grip area of the machine is ergonomically designed and weight is significantly reduced. The balanced weight distribution ensures fatigue-free clipping also under constant load.

Through the optimised air filter large air masses are left so that an optimum cooling of the motor and of the machine could be realized.

Delivered with clipping head VIII, shear blade set LC 102 (cutting height 3 mm), new combination wrench and special shear machine oil in a sturdy plastic case.

- **Power supply:** 230 Volt / 50 Hertz
- **Rated power:** 200 Watt DC (equivalent to about 400 Watt AC)
- **Cutting speed:** approx. 2.500 double strokes/min.
- **Dimensions:** 51 x 52 x 320 mm
- **Sound level:** 71 dB (A) LpA
- **Cooling:** Passage ventilation for motor, gearbox, clipping head and cutting blade
- **Drive system:** single step, encapsulated, vacuum permanent lubrication
- **Clipping head:** SK VIII, aluminium black coated
- **Cutter drive system:** Vibratory drive system with a novel pressure distribution for long life; smooth running
- **Airfilter:** new air filter, can be cleaned and removed without tools
- **Weight:** only 1.120 g (without cable)
- **Cable length:** 5 m with European plug
- **Suitable clipping blades:** LC 102, LC 122, LC 1253, LC 106, LC 107

**Premium Power!**

### THE NEW DC MOTOR

The general difference between an AC motor (alternating current motor) and a DC motor (direct current motor) is in the design and construction of the engines.

At the DC motor the rotor is electrified and the stator consists of a permanent magnetic field while at the AC motor both the stator (static component) and the rotor (rotating component) are electrified.

Because of this the DC-engine requires significantly smaller installation space whereby the housing of the animal clipper can be designed smaller and more ergonomically.

Furthermore the DC motor technology is very energy-efficient.

A DC-motor with 200 watts of power is comparable with a previous 400 Watt AC-motor.

The DC-motor also shows a significantly higher sturdiness during the shearing process compared to the AC-motor.

The torque of the DC-motor is so strong that there are no noticeable output speed reductions even during the shearing process of very dirty fur.

## Horse Clippers

### PROFI LINE HORSE (1700-1-DC)

The new generation of clippers for the professional horse clipping.  
 The powerful DC motor (DC Technology) with a power of 200 Watt (corresponds to about 400 Watt in conventional AC Technology) convinces even under the most adverse conditions without noticeable drop in speed.  
 The new engine technology of the grip area of the machine is ergonomically designed and weight is significantly reduced. The balanced weight distribution ensures fatigue-free clipping also under constant load.  
 Through the optimised air filter, large air masses are left, so that an optimum cooling of the motor and the machine is made possible.

Delivered with clipping head II D, clipper blade set LC A 2 (Cutting height 3 mm) and special clipper oil in robust plastic case.

- **Power supply:** 230 Volt / 50 Hertz
- **Rated power:** 200 Watt DC (equivalent to about 400 Watt AC)
- **Cutting speed:** approx. 2.500 Double strokes/min.
- **Dimensions:** 51 x 52 x 290 mm
- **Sound level:** 78 dB (A) LpA
- **Cooling:** Passage ventilation for motor, gearbox, shear head and cutting blade
- **Drive system:** single step, encapsulated, vacuum permanent lubrication
- **Clipping head:** SK II, aluminium silver coated
- **Blade drive system:** HGW eccentric drive system with a novel pressure distribution for long life; smooth running
- **Airfilter:** new air filter, can be cleaned and removed without tools
- **Weight:** only 1.030 g (without cable)
- **Cable length:** 5 m with European plug
- **Suitable clipping blades:** LC A 2, LC A 22, LC A 253, LC A 6, LC A 7

## Horse Clippers

### CUTLI (1400-10)

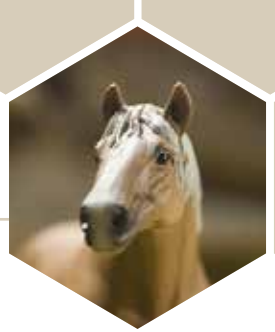

This slim horse clipper is extremely silent and non-vibrating. The ergonomic body houses a powerful permanent magnet motor with high torque assures the perfect clipping result. Due to its well-balanced minimal weight this clipper will win over retail customers as well as professional horse owners. The CUTLI comes ready to use equipped with our new clipping head VIII, a set of blades LC 102 (clipping height approx. 3 mm) and our special clipper oil in a handy plastic case.

- **Power supply:** 230 Volt / 50 Hertz
- **Rated power:** 90 Watt
- **Cutting speed:** approx. 2.200 double strokes per minute
- **Dimensions:** 48 x 48 x 285 mm
- **Noise level:** 67 dB (A) LpA
- **Cooling system:** a new form of aeration for motor, transmission, clipping head and blades
- **Drive system:** single-step, encapsulated, self-lubricating
- **Clipping head:** silver and black coated
- **Cutter drive system:** oscillating cutter drive system with new pressure distribution for longer lifespan; extremely silent and non-vibrating
- **Airfilter:** easily removed without tools, quick and easy to clean
- **Weight:** only 1.010 g (without cable)
- **Cable:** 5 m long with European plug CEE 7/17 (other plugs available on request)
- **Suitable clipping blades:** LC 102, LC 122, LC 1253, LC 106, LC 107

Article	Article no.	Quantities

CUTLI (housing: black / clipping head: black) with set of blades LC 102	10-8001177	per pcs
CUTLI (housing: brown / clipping head: black) with set of blades LC 102	10-8001178	per pcs
CUTLI (housing: saphirblue / clipping head: black) with set of blades LC 102	10-8001179	per pcs
CUTLI (housing: red / clipping head: black) with set of blades LC 102	10-8001115	per pcs
CUTLI (housing: red / clipping head: silver) with set of blades LC 102	10-8001110	per pcs
CUTLI (housing: green / clipping head: black) with set of blades LC 102	10-8001135	per pcs
CUTLI (housing: green / clipping head: silver) with set of blades LC 102	10-8001130	per pcs
CUTLI (housing: blue / clipping head: silver) with set of blades LC 102	10-8001120	per pcs
CUTLI (housing: blue / clipping head: black) with set of blades LC 102	10-8001125	per pcs
CUTLI (housing: purple / clipping head: black) with set of blades LC 102	10-8001105	per pcs
CUTLI (housing: purple / clipping head: silver) with set of blades LC 102	10-8001100	per pcs
CUTLI (housing: white / clipping head: black) with set of blades LC 102	10-8001145	per pcs
CUTLI (housing: pink / clipping head: silver) with set of blades LC 102	10-8001180	per pcs

The CUTLI is most impressive due to its powerful motor and its wide clipping head. Moreover it has a remarkable and ergonomic design.

The CUTLI is available in a variety of colours such as black, brown, saphirblue, red, green, blue, purple, white and pink.

The clipping heads can be delivered in aluminium silver or polished black.

They are designed to take our first-class cutters & combs from the 100 series. You will receive the CUTLI in a tool case.

## Horse Clippers

### SUPER 3000 (1300-2-TD)

This proven animal clipper convinces by its outstanding 350 watts performance and the large power reserve.

The powerful motor ensures a clean cutting results.

Cutters and combs can be exchanged easily.

The handy ergonomic grip at the clipping head and the well balanced weight distribution ensures for fatigue-free clipping even under constant use.

The Super 3000 comes complete with a set of LC A2 blades (cutting height approx. 3mm) and special clipper oil in a solid and robust plastic tool case.

- **Power supply:** 230 Volt / 50 Hertz
- **Rated power:** 350 Watt
- **Cutting speed:** approx. 2.200 double strokes per minute
- **Dimensions:** 57 x 54 x 285 mm
- **Noise level:** 85 dB (A) LpA / 93 dB (A) LWA
- **Cooling system:** special dual purpose ventilation system for motor, transmission, clipping head and cutters and combs
- **Drive system:** double step, encapsulated, permanent lubricated
- **Clipping head:** SK I, aluminium, silver coated
- **Cutter drive system:** Complete eccentric drive system with novel tension distributor for smooth running and a longer lifespan
- **Airfilter:** No tools needed! Easy to remove and clean.
- **Weight:** only 1.300 g (without cable)
- **Cable:** 5 m long with European plug CEE 7/17 (other plugs available on request)
- **Suitable clipping blades:** LC A 2, LC A 22, LC A 253, LC A 6, LC A 7, LC A 707

## Horse Clippers

### EQUI AKKU LI-ION (1600-4)

Battery clipper with new Lithium-Ion battery, 2000 mAh capacity and approximately 23% less weight compared to the Equi Akku Perfekt battery clipper. Fatigue-free shearing with this cordless clipper is no problem within a shearing period of up to 60 minutes.

The very smooth operating clipping machine can be handled in an easy way due to its slim and relatively short housing.

The high performance engine guarantees perfect shearing results.

The whole weight of the machine could be reduced because of the new Lithium-Ion battery technology.

It has got a positive effect on the weight balance as well.

Perfectly suited for fine cut, we recommend the Profi Line Horse or Cutli machine for the complete cut.

The EQUI AKKU LI-ION machine will be delivered with black coated clipping head VIII, set of blades LC 102 (average height 3 mm) battery charger and special clipper oil in a robust plastic case.

- **Power supply:** 7.2 Volt DC, by the new Lithium-Ion battery with 2000 mAh
- **Rated power:** comparable to a 100 Watt mains power clipper
- **Cutting speed:** ~ 2.100 double strokes per minute
- **Dimensions:** 50 x 49 x 300 mm
- **Noise level:** 71 dB (A) LpA
- **Drive system:** single step, encapsulated, self-lubricating
- **Clipping head:** SK VIII, aluminium black coated
- **Cutter drive system:** "whispering" oscillating cutter drive system with pressure distributor for longer lifespan runs extremely quiet
- **Weight:** only 880 g
- **Suitable clipping blades:** LC 102, LC 122, LC 1253, LC 106, LC 107
- **Battery running time:** up to 60 minutes (2000 mAh Lithium-Ionen battery)
- **Charging time:** ~ 50 minutes

## Horse Clippers

### EQUI AKKU PERFEKT (A 1600-3)

The 7,2 Volt clipper with nickel metal hybride battery and 3000 mAh allows for cordless shearing up to 2 hours. This silent animal clipper from Lister Germany has an excellent grip due to its slim and short housing.

Thanks to its well balanced weight distribution clipping is no longer tiresome even during longer operation. Its powerful motor ensures perfect clipping results. Combs and cutters are easy and quick to exchange.

It comes along with clipping head VIII, a set of blades LC 102 (clipping height approx. 3 mm) and battery charger in a handy and solid plastic carrying case together with our special clipping oil.

- **Power supply:** 7,2 Volt DC
- **Rated power:** comparable with an 100 Watt mains power clipper
- **Cutting speed:** approx. 2.100 double strokes per minute
- **Dimensions:** 50 x 49 x 315 mm
- **Noise level:** 68 dB (A) LpA
- **Drive system:** single step, encapsulated, self-lubricating
- **Clipping head:** aluminium black coated
- **Cutter drive system:** "whispering" oscillating cutter drive system with pressure distributor for longer lifespan run, extremely quiet
- **Weight:** only 1.145 g (without cable)
- **Suitable clipping blades:** LC 102, LC 122, LC 1253, LC 106, LC 107
- **Battery runningtime:** up to 2 hours (3000 mAh battery)

## Cattle clippers

### PROFI LINE CATTLE (1700-1-DC)

The new generation of shearing machines for professional cattle clipping.

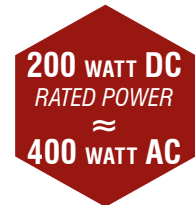

The powerful DC motor (DC Technology) with a power of 200W (corresponds to about 400W in conventional AC Technology) convinces even under the most adverse conditions without noticeable drop in speed.

The new engine technology of the grip area of the machine is ergonomically designed and weight is significantly reduced. The balanced weight distribution ensures fatigue-free clipping also under constant load.

Through the optimised air filter, large air masses are left, so that an optimum cooling of the motor and the machine is made possible.

Delivered with clipping head VIII, shear blade set LC 106 (cutting height 3 mm), new combination wrench and special shear machine oil in a sturdy plastic case.

- **Power supply:** 230 Volt / 50 Hertz
- **Rated power:** 200 Watt DC (equivalent to about 400 Watt AC)
- **Cutting speed:** approx. 2.500 Double strokes/min.
- **Dimensions:** 51 x 52 x 320 mm
- **Sound level:** 71 dB (A) LpA
- **Cooling:** Passage ventilation for motor, gearbox, shear head and cutting blade
- **Drive system:** single step, encapsulated, vacuum permanent lubrication
- **Clipping head:** SK VIII, aluminium silver coated
- **Cutter drive system:** Vibratory drive system with a novel pressure distribution for long life; smooth running
- **Airfilter:** new air filter, can be cleaned and removed without tools
- **Weight:** only 1.120 g (without cable)
- **Cable length:** 5 m with European plug
- **Suitable clipping blades:** LC 106, LC 107, LC 102, LC 122, LC 1253

## Cattle clippers

### AKKU LI-ION (A 1600-4)

Battery clipper with new Lithium-Ion battery, 2000 mAh capacity and approximately 23% less weight compared to the Equi Akku Perfekt battery clipper. Fatigue-free shearing with this cordless clipper is no problem within a shearing period of up to 60 minutes.

The very smooth operating clipping machine can be handled in an easy way due to its slim and relatively short housing.

The high performance engine guarantees perfect shearing results.

The whole weight of the machine could be reduced because of the new Lithium-Ion battery technology. It has got a positive effect on the weight balance as well.

Perfectly suited for udder clipping, we recommend the Profi Line Cattle machine for the complete cut.

The EQUI AKKU LI-ION machine will be delivered with black coated clipping head VIII, set of blades LC 106 (average height 3 mm) battery charger and special clipper oil in a robust plastic case.

- **Power supply:** 7.2 Volt DC, by the new Lithium-Ion battery with 2000 mAh
- **Rated power:** comparable to a 100 Watt mains power clipper
- **Cutting speed:** ~ 2.100 double strokes per minute
- **Dimensions:** 50 x 49 x 300 mm
- **Noise level:** 71 dB (A) LpA
- **Drive system:** single step, encapsulated, self-lubricating
- **Clipping head:** SK VIII, aluminium black coated
- **Cutter drive system:** "whispering" oscillating cutter drive system with pressure distributor for longer lifespan runs extremely quiet
- **Weight:** only 880 g
- **Suitable clipping blades:** LC 102, LC 122, LC 1253, LC 106, LC 107
- **Battery running time:** up to 60 minutes (2000 mAh Lithium-Ionen battery)
- **Charging time:** ~ 50 minutes

## Cattle clippers

### AKKU PERFEKT (A 1600-3)

The 7,2 Volt clipper with nickel metal hybride battery and 3000 mAh allows for cordless shearing up to 2 hours. This silent animal clipper from Lister Germany has an excellent grip due to its slim and short housing.

Thanks to its well balanced weight distribution clipping is no longer tiresome even during longer operation.

Its powerful motor ensures perfect clipping results. Combs and cutters are easy and quick to exchange.

It comes along with a set of blades LC 106 (clipping height approx. 3 mm) and battery charger in a handy and solid plastic carrying case together with our special clipping oil.

- **Power supply:** 7,2 Volt DC
- **Rated power:** comparable with an 100 Watt mains power clipper
- **Cutting speed:** approx. 2.100 double strokes per minute
- **Dimensions:** 50 x 49 x 315 mm

## Dog clippers

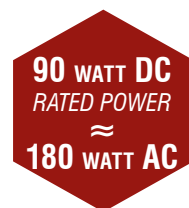

### DOGLI (1400-10)

This DOGLI dog clipper is a clipping machine for large dogs and recalcitrant hair! It is equipped with a very quiet, nonvibrant and high performance permanent magnet motor.

It's ergonomic design offers easy handling and has a flatter shearing head which provides for a wider cutting area. The new aeration system is so designed that shorn hair will not be blown in your way. This relentless worker will not let down when under pressure.

The DOGLI is already fitted with our shearing head II and LC A 7 blades and comes to you in a sturdy plastic case along with a LC A 7 plastic comb (total cutting height 11mm) and our special clipping oil.

- **Power supply:** 230 Volt / 50 Hertz
- **Rated power:** 90 watt
- **Cutting speed:** approx. 2.200 double strokes per minute
- **Dimensions:** 48 x 48 x 260 mm
- **Noise level:** 76 dB (A) LpA
- **Cooling system:** new aeration system for motor, transmission, clipping head and blades
- **Drive system:** single step, encapsulated, self-lubricating
- **Clipping head:** aluminium black coated
- **Cutter drive system:** Complete eccentric drive system with novel tension distributor for smooth running and a longer lifespan
- **Airfilter:** No tools needed! Easy to remove and clean
- **Weight:** only 900 g (without cable)
- **Cable:** 5 m long with European plug CEE 7/17 (other plugs available on request)
- **Suitable clipping blades:** LC A 7

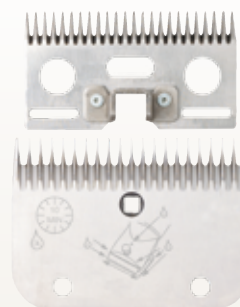

Article	Article no.	Quantities

## Cutters & combs - horses

### LC A 2

Set of cutter and comb for clipping head I and II, for horse trimming and udder clipping.

- **cutter:** 24 teeth
- **comb:** 35 teeth
- **cutting height:** approx. 3 mm
- **cutting width:** approx. 75 mm

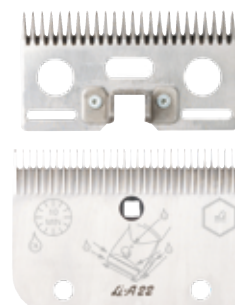

Article	Article no.	Quantities
LC A 2 set of blades	15-0203010	per pcs / 10 per carton
Cutter for LC A 2, LC A 22, LC A 253	15-0304013	per pcs
LC A 2 Comb	15-0304012	per pcs

### LC A 22

Set of cutter and comb for clipping head I and II, for a close cut to the skin - ideal for veterinary purposes, show- and sport trimming.

- **cutter:** 24 teeth
- **comb:** 35 teeth
- **cutting height:** approx. 0,8 - 1 mm
- **cutting width:** approx. 75 mm

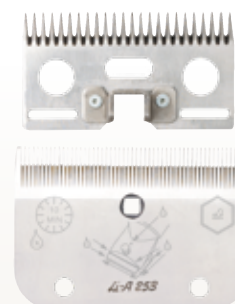

Article	Article no.	Quantities
LC A 22 set of blades	15-0203510	per pcs / 10 per carton
Cutter for LC A 2, LC A 22, LC A 253	15-0304013	per pcs
LC A 22 Comb	15-0305012	per pcs

### LC A 253

Set of cutter and comb for clipping head I and II, for the closest and cleanest cut to the skin mainly for veterinary and surgical purposes or special trimming effects.

- **cutter:** 24 teeth
- **comb:** 53 teeth
- **cutting height:** approx. 0,5 mm
- **cutting width:** approx. 75 mm

Article	Article no.	Quantities
LC A 253 set of blades	15-0203810	per pcs / 10 per carton
Cutter for LC A 2, LC A 22, LC A 253	15-0304013	per pcs
LC A 253 Comb	15-0305055	per pcs

## Cutters & combs - cattle

### LC 106

Set of cutter and comb for clipping clean and stable-kept cattle.

- **cutter:** 23 teeth
- **comb:** 21 teeth
- **cutting height:** approx. 3 mm
- **cutting width:** approx. 75 mm

Article	Article no.	Quantities

Plastic comb attachment for blades LC A 7

- **cutting height:** 11 mm

Article	Article no.	Quantities
Plastic comb LC A 7	15-0202007	per pcs / 10 per carton

### LC A 56 SR

The special "two-in-one" cutter and comb for sheep shearing and for cattle clipping. The perfect cutter and comb for cattle with filthy, dirty and tangled-up hair.

- **cutter:** 4 teeth
- **comb:** 25 teeth
- **cutting height:** approx. 3 mm
- **cutting width:** approx. 79 mm

Article	Article no.	Quantities
LC A 56 SR set of blades	15-0208610	per pcs / 10 per carton
LC A 5 Cutter	15-0330012	per pcs
LC A 56 SR Comb	15-0333013	per pcs

## Sheep shearing machines

### PROFI LINE SHEEP (1700-1-DC)

The new generation of shearing machines for professional sheep clippers.

The powerful DC motor (DC Technology) with a power of 200 Watt (corresponds to about 400 Watt in conventional AC Technology) convinces even under the most adverse conditions without noticeable drop in speed.

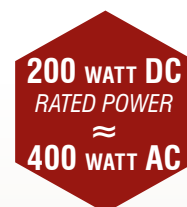

The new engine technology of the grip area of the machine is ergonomically designed and weight is significantly reduced. The balanced weight distribution ensures fatigue-free clipping also under constant load.

To improve the sliding properties of the shearing head, the attachment- screws of the clipper blade were processed and rounded. Through the optimised air filter, large air masses are left, so that an optimum cooling of the motor and the machine is made possible.

Delivered with clipping head V, shear blade set LC A5 (cutting height 3 mm), new combination wrench and special shear machine oil in a sturdy plastic case.

For camel clipping, we recommend our retrofittable front cover

- **Power supply:** 230 Volt / 50 Hertz
- **Rated power:** 200 Watt DC (equivalent to about 400 Watt AC)
- **Cutting speed:** approx. 2.500 Double strokes/min.
- **Dimensions:** 51 x 52 x 340 mm
- **Sound level:** 78 dB (A) LpA
- **Cooling:** Passage ventilation for motor, gearbox, shear head and cutting blade
- **Drive system:** single-step, Vacuum permanent lubrication
- **Clipping head:** SK V, aluminium
- **Cutter drive system:** Eccentric drive system with pressure distribution; lifetime for long smooth running
- **Airfilter:** new air filter, can be cleaned and removed without tools
- **Weight:** only 1.310 g (without cable)
- **Cable length:** 5 m with European plug
- **Suitable clipping blades:** LC A 5, LC A 54, LC A 55, LC A 56 SR, LC A 57, LC A 58

Article	Article no.	Quantities
PROFI LINE Schaf with set of blades LC A 5	10-2000100	per pcs
PROFI LINE Lama & Alpaka mit Messersatz LI A 57	10-2000001	per pcs

## Sheep shearing machines

### SUPER PROFI 3000 (1300-2-TD)

The professionals electric sheep clipper.  
430 Watt of real shearing power wins over in all circumstances.  
The handy ergonomic grip at the shearing head and the well balanced weight distribution ensure for fatigue-free clipping even under constant use.  
Cutters and combs can be exchanged easily.

The Super Profi 3000 comes complete with a set of LC A 5 blades (cutting height approx. 3mm) and our special clipper oil in a solid and robust plastic case.

- **Power supply:** 230 Volt / 50 Hertz
- **Rated power:** 430 Watt
- **Cutting speed:** approx. 2.200 double strokes per minute
- **Dimensions:** 57 x 54 x 340 mm
- **Noise level:** 82 dB (A) LpA / 90 dB (A) LWA
- **Cooling system:** special dual purpose ventilation system for motor, gear-box, clipping head and cutters and combs
- **Clipping Head:** SK V, aluminium
- **Drive system:** double step, encapsulated, gears permanent lubricated
- **Cutter drive system:** Complete eccentric drive system with novel tension distributor for smooth running and a longer lifespan
- **Airfilter:** No tools needed! Easy to remove and clean
- **Weight:** only 1.600 g (without cable)
- **Cable:** 5 m long with European plug CEE 7/17 (other plugs available on request)
- **Suitable clipping blades:** LC A 5, LC A 54, LC A 55, LC A 56 SR, LC A 57, LC A 58

**430 WATT**  
RATED POWER

### A 3

Set of cutter and comb for sheep shearing a few animals.

- **cutter:** 3 teeth
- **comb:** 10 teeth
- **cutting height:** approx. 3 mm
- **cutting width:** approx. 57 mm

Article	Article no.	Quantities
A 3 set of blades	15-0207000	per pcs / 150 per carton

## Small animal clippers

### PROFI LINE MINI AKKU (1800-1)

The new PROFILINE MINI is a professional battery clipper to perfectly shear small animals as well as specific body parts of horses or cattle like their heads, tails or udders.

Thanks to the LI-ION-Battery-Technology the run-time of shearing amounts approx. 90 minutes.

Based on the loading time of the second battery equaling approx. 60 minutes, a continuous shearing is done smoothly.

The machine is also available with a 230 Volt power supply unit for direct operation.

The scope of supply includes a robust storage case and a K 10 set of shearing blades.

A high quality charger with additional charging unit for a second battery will be supplied together with the battery machine.

The clipping heads are compatible with models of other manufacturers.

- **Power supply:** 7,2 Volt DC - 35 Watt
- **Cutting speed:** approx. 2.650 double strokes/min.
- **Measurements (LxBxH):** 204 x 49 x 40 mm
- **Noise level:** 58 dB (A) LpA
- **Weight:** 420 g
- **Matching clippers:** K 5; K 8,5; K 10; K 40; K 10 W
- **Run-time:** approx. 90 min.
- **Loading time:** approx. 60 min.

SPECIAL CLIPPER OIL 500 ML	15-0340001	per pcs

### SPECIAL CLIPPER OIL 50 ML

This oil is developed especially for clippers to guarantee the proper lubrication of all relevant components such as the eccentric and the cutters and combs. Our tip: Do not use any other oil than LISCOP Clipper Oil, as this may cause a disruption of the oil film which can lead to (over-)heating of the blades and clipping head.
